SUMMARY

Product-minded builder with hands-on full-stack experience (React, Node.js, TypeScript) and ownership of AI/LLM workflow design end-to-end. Currently drives AI content production strategy at PhysicsWallah, partnering with product and content stakeholders to translate ideas into working prototypes. Combines technical execution with product thinking: scoping, prioritization, and data-informed iteration.

SKILLS

Product & Business: Product Strategy, Roadmapping, PRD & Spec Writing, Prioritization Frameworks (RICE, MoSCoW), Agile/Scrum, Sprint Planning, A/B Testing, User Research, Competitive Analysis, Stakeholder Management, Cross-Functional Collaboration, Data-Driven Decision Making, Go-To-Market Support

Technical: JavaScript, TypeScript, Python, React.js, Next.js, Node.js, Express, REST API Design, SQL, PostgreSQL, Prisma, MongoDB, Redis

Tools: Git, Docker, Figma, Jira, Notion, Command Line, CI Basics

WORK EXPERIENCE

PW (PhysicsWallah) — AI Filmmaker Project Associate (Apprenticeship) **February 2026 – Present**
Noida · Hybrid

- Worked on 20+ AI filmmaking projects for the PW App / PI section.
- Researched and tested 30+ AI tools to improve content production workflows.
- Coordinated with 8+ team members across creative and production teams.
- Tracked content metrics and contributed to improving content performance.
- Managed project timelines, meetings, deliverables, and stakeholder communication.

HighFurries — Tech & Product Intern **January 2025 – July 2025**
Dwarka

- Researched user needs and competing products to scope requirements and prioritize features for a 2–3 person product team.
- Built and shipped responsive full-stack features with React.js, Node.js, and REST APIs, owning each from development to deployment.
- Integrated third-party APIs, optimized frontend performance, and maintained code quality through peer review and debugging.
- Supported planning and execution of “Paint with Pets”, a live customer engagement event.

PROJECTS

PayRevive (RecoverAI) — AI Voice Agent for Payment Recovery

Built for Razorpay AI Buildathon — Track 3: AI Revenue Recovery | Live: payrevive.xyz

- Built an AI-powered Hinglish voice-call agent for Razorpay merchants that detects failed payments, diagnoses root causes, and autonomously initiates recovery calls, governed by a deterministic policy engine with a ₹50K autonomous action ceiling.
- Implemented HMAC-SHA256 signed webhook verification, Gemini-based intent classification, and full audit-trail logging to ensure secure, explainable, and compliant autonomous decision-making.

PrepSense — AI Resume Analyzer & Voice Interview Coach

Live: prep-sense-kappa.vercel.app

- Built a role-agnostic AI platform that analyzes resumes for ATS compatibility, generates field-specific bullet rewrite suggestions, and runs voice-based mock interviews with 5–7 role-tailored questions and cross-session progress tracking.

Real Estate Listing Platform & Barcode Inventory System

Freelance Projects

- Built a property listing and lead-management web application for a real estate business using React.js and Node.js, enabling searchable property browsing and lead capture.
- Built an inventory management system for a retail shop using React.js and Node.js, with barcode-scanner integration for real-time stock tracking and updates.

ACHIEVEMENTS

- Winner, HackQuest Hackathon – MSIT — Built EduApp (BlockEd), a blockchain-based education platform with gamified learning and NFT on-chain certificates, using React, TypeScript, and Solidity. (April 2025)

EDUCATION

Netaji Subhas University of Technology, Delhi — B.Tech, Computer Science
